Spring 2012

Marston Court

This client required a custom made gate which appeared to be in situ for years. We assisted by providing photo montage designs of the gates in position prior to manufacture. These were reviewed by the client until we found the precise design and dimensions that complemented the surroundings correctly. The starting point was the Hundhill Hall design as seen on our website [www.peterweldon.co.uk](http://www.peterweldon.co.uk)

We also helped by designing the stone pillars.

The following pages illustrate the process from design, to production and manufacture. The entrance was automated with a CAME frog kit and Telguard keypad. Installation was by Charlie Griffiths.

Peter Weldon.
