Regency Covered Balcony

A first floor covered balcony with a UV tinted glass canopy. The design is inspired by an original in Wells ,Somerset.. A challenging installation that required the use of a specialist crane .

The house has undergone an extensive renovation with sympathetic additions and beautiful interiors. The client considers the balcony to be 'the icing on the cake!'.

The ironwork is designed at our studios in South Wales, and manufactured under our direction in Bulgaria by Aquairon. www.aquairon.com Installation is carried out by our partner firm Charlie Griffiths www.cgautomatedgates.co.uk

The following photos illustrate the process from design, through to production and installation.
