

PETER WELDON
IRON DESIGNS LTD.

Design and Manufacture of Period and Architectural Ironwork

Summer 2014

Elstree, North London.

Stair balustrade with matt black paint finish foliate designs and hot forged scrollwork.

Designed by Peter and Louise Weldon in the Uk. Manufactured under our direction by partners *Aquairon* of Bulgaria.

This client required a custom made balustrade which would complement the dramatic interior of the house. We assisted by providing all drawings, design combinations and photo montage images of the ironwork in position prior to manufacture. These were reviewed by the client until we found the precise design and dimensions that complemented the interiors correctly. The starting point for the staircase was the Wrought mews design as seen on our website www.peterweldon.co.uk

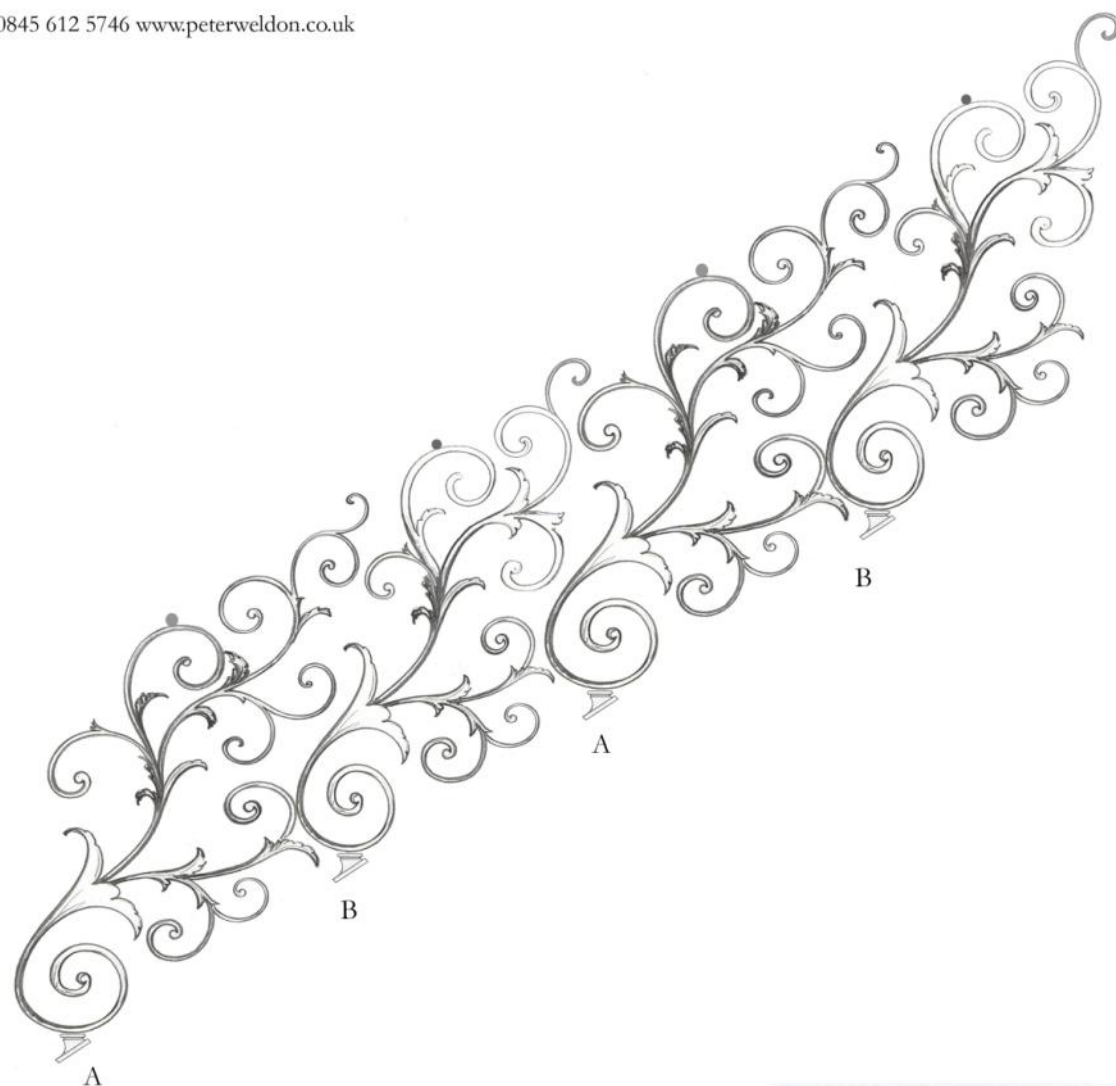

We also helped by providing samples for inspection prior to manufacturing the entire job.

Installation was by Peter Weldon and Charlie Griffiths.
