Fitzrovia Pedestrian gate & Railings

Pedestrian gate and railings for listed property in Central London.

This client required a pedestrian gate and railings for the entrance of his Georgian townhouse. The brief stated that the ironwork should appear to have been in place for years. Inspiration came from original railings found in the area. We assisted by providing design concepts of the gate and railings in position prior to manufacture. These were reviewed by the client until we found the precise design and dimensions that complemented the building correctly. The design was drawn accurately in DWG. Before proceeding with manufacture we supplied samples for inspection.

The following pages illustrate the process from design, manufacture, and installation. Designed by Peter Weldon Iron Designs; Manufacture was by our partner firm Aquairon of Bulgaria. Installation was by Charlie Griffiths and Peter Weldon.

Peter Weldon.

Core drilling into the coping stone in the traditional blacksmith manner.

Anti-theft hinges and bespoke cast collars to provide a decorative finish to each vertical railing and also to cover evidence of core drilling.
