Grafton Gates

Entrance Gates

This client required entrance gates for their home in the South of England. The main function of the gates was mainly for pedestrian use and to keep vehicles away from the property. Mrs Ian particularly liked ornate scroll-work and helped the design process with images of original ironwork she liked.

We assisted by providing design concepts of the gates in position prior to manufacture. These were reviewed by the client until we found the precise design and dimensions that complemented the house correctly. The design was drawn accurately in DWG.

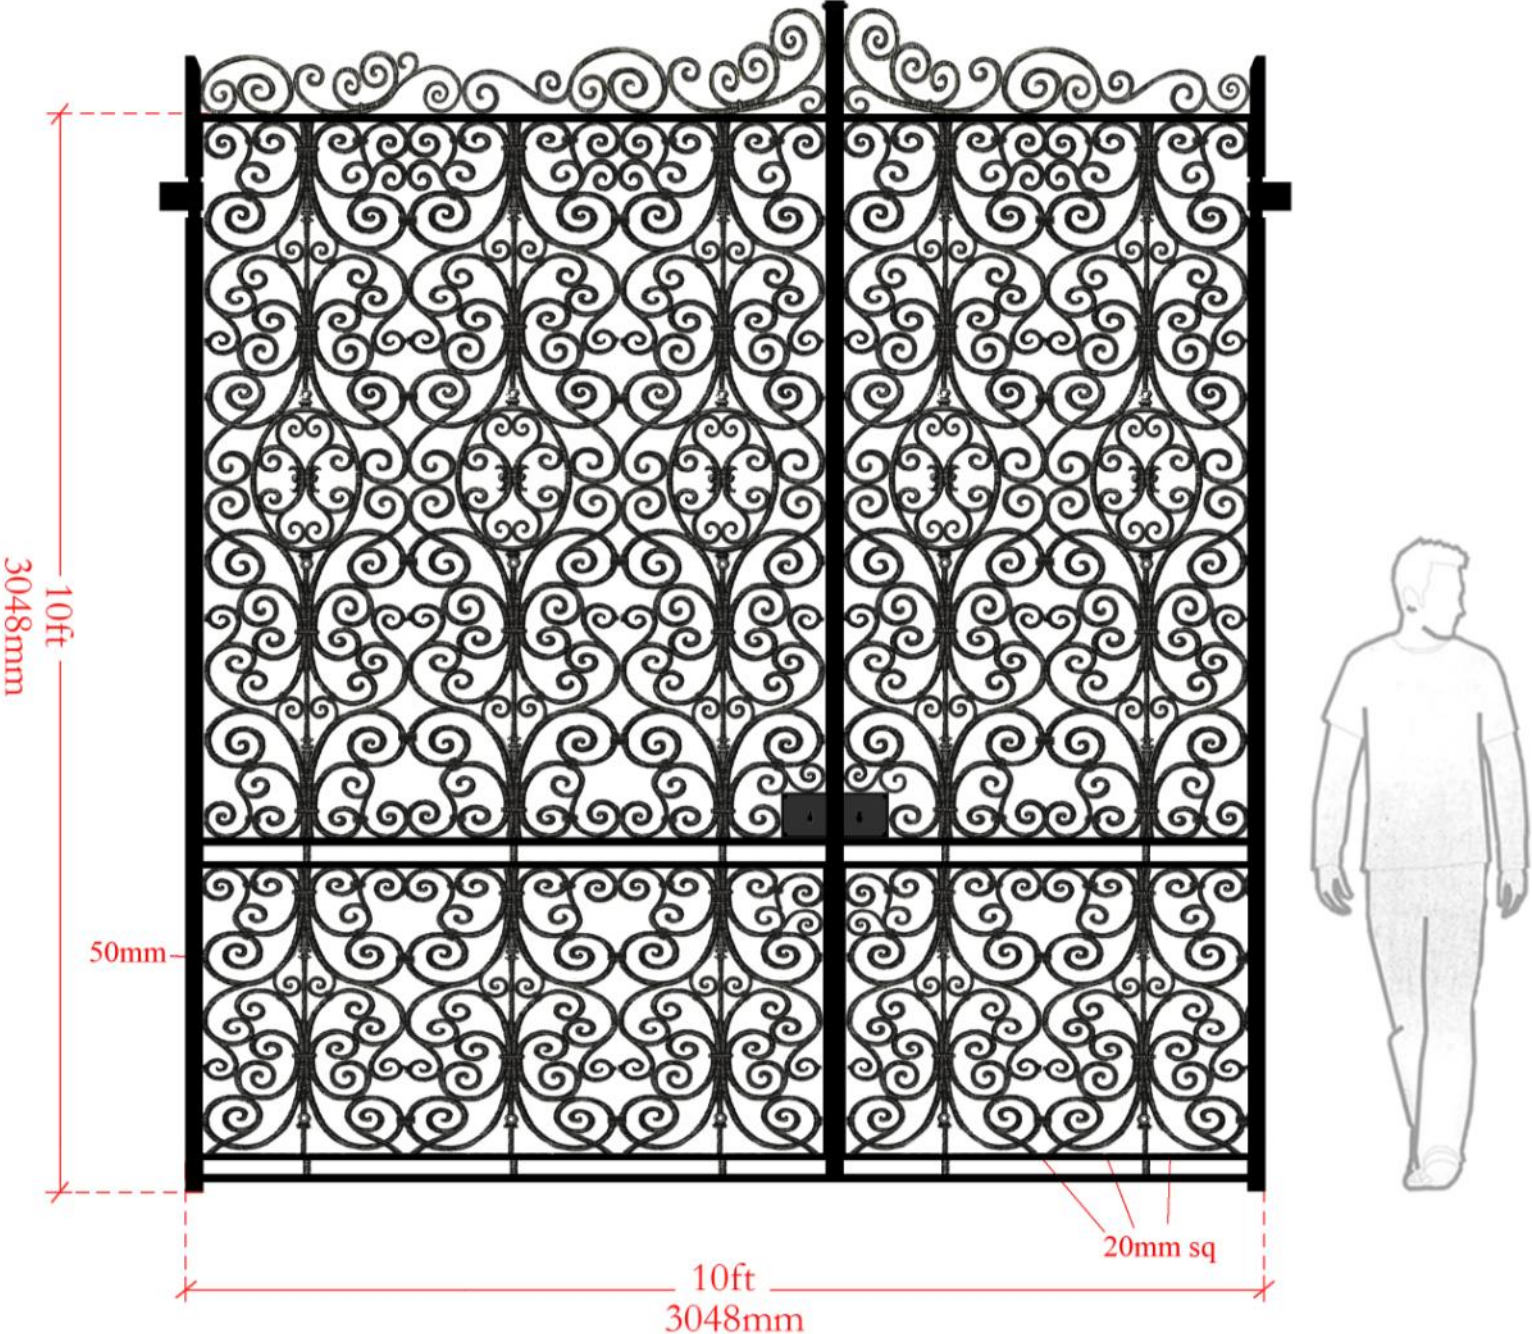

The following pages illustrate the process from design, manufacture, and installation. Designed by Louise Weldon of Peter Weldon Iron Designs; Manufacture was by our partner firm Aquairon of Bulgaria. Installation was by Charlie Griffiths and Peter Weldon.

Peter Weldon.

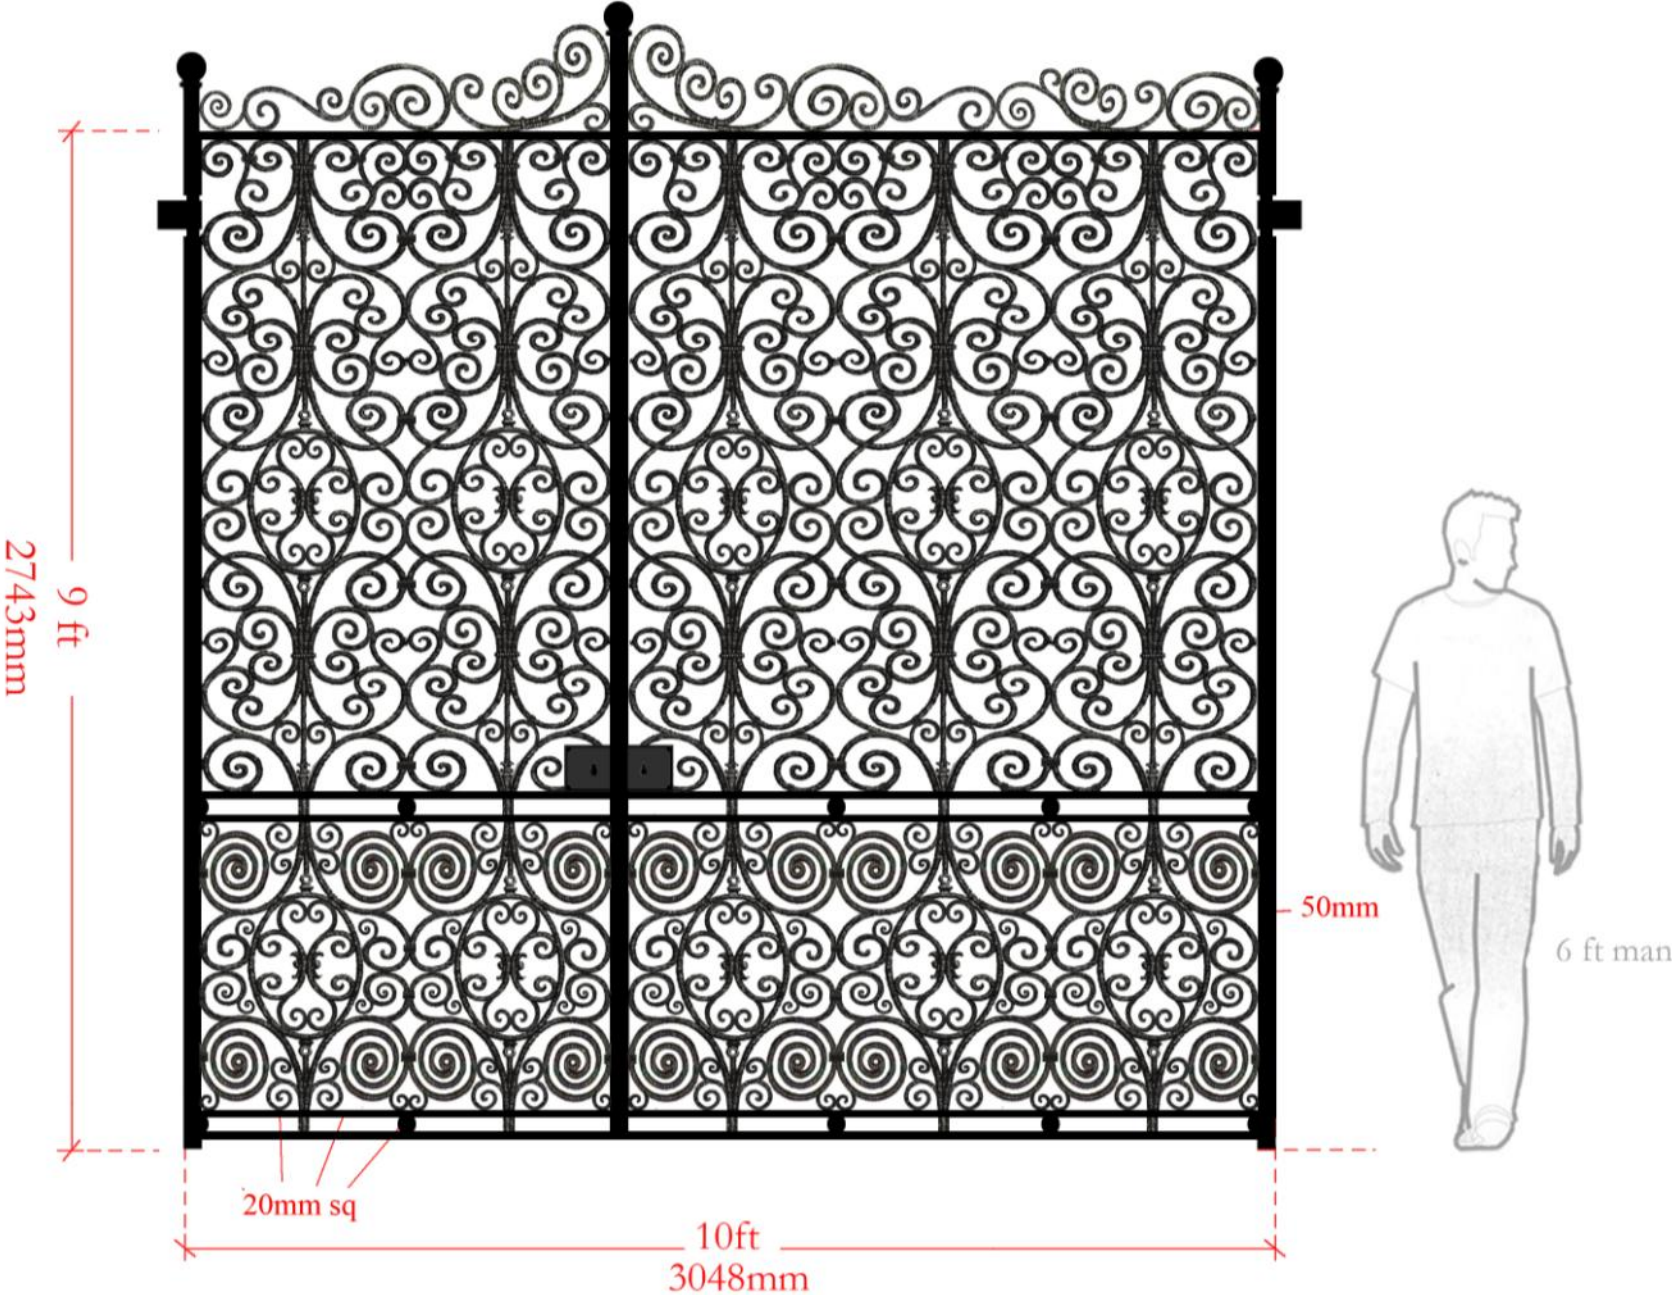

Drawings of original ironwork that were the inspiration for the Grafton gates.

Design Option 1

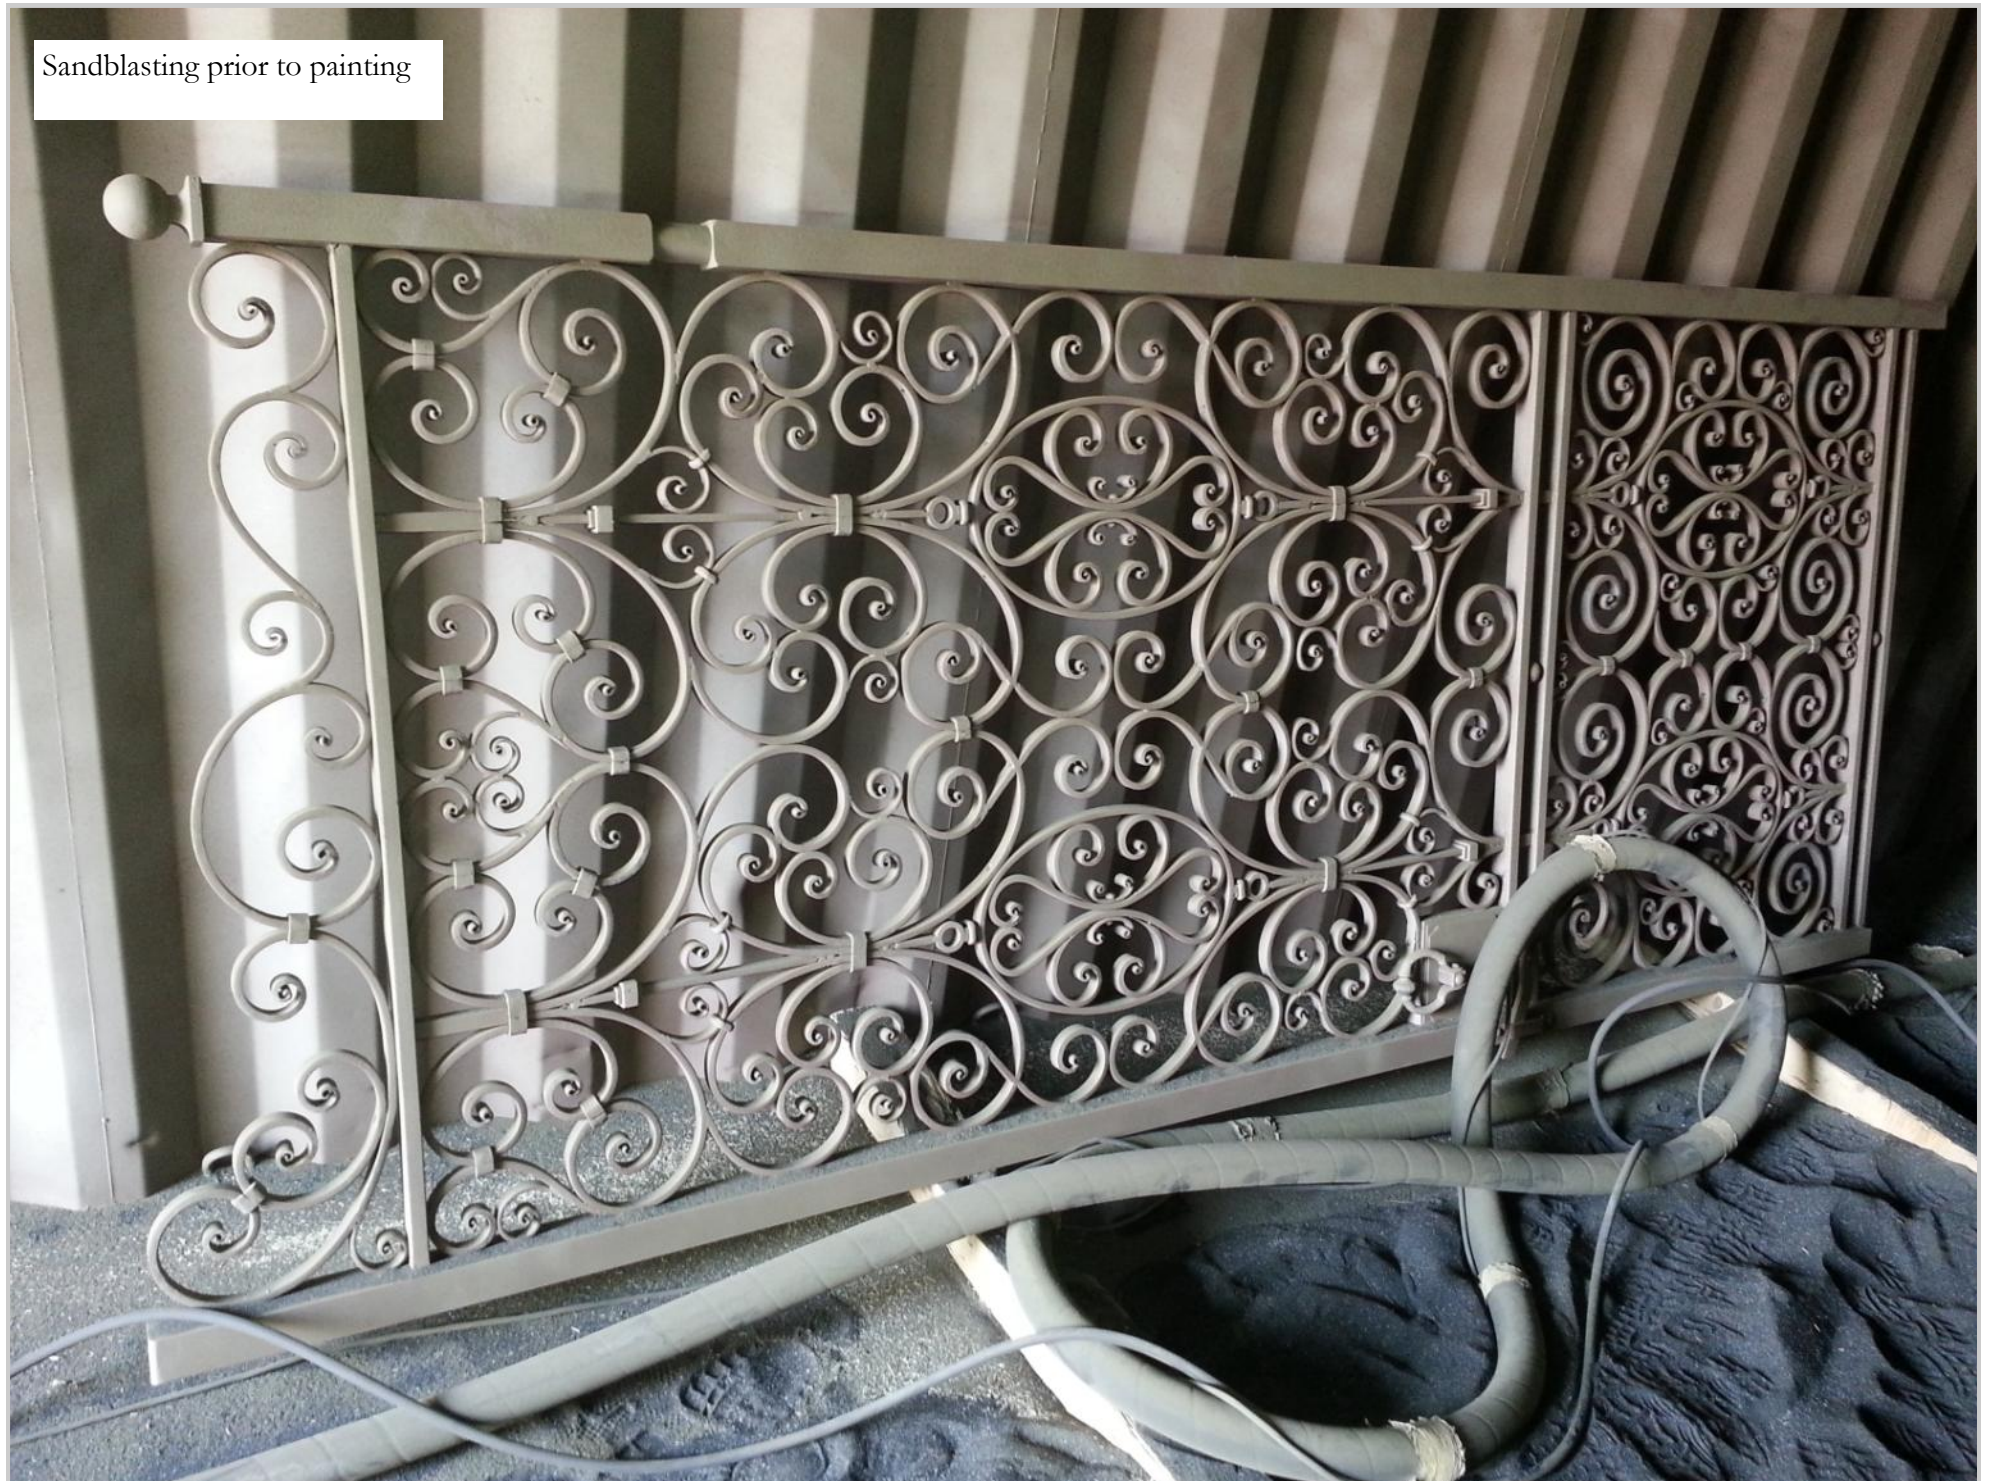

Design Option 2

Sandblasting prior to painting

Driveway prior to installation.
